PROFESSIONAL SUMMARY

Recent 2026 B.E IT Graduate with hands-on experience in Python, Machine Learning, and AI-powered applications. Built projects using TensorFlow, CNN, OpenCV, and Azure AI. Completed a full-stack internship contributing to production systems. Passionate about solving real-world problems with AI and actively building skills in LLMs, NLP, and Generative AI.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

AI/ML Libraries: TensorFlow, OpenCV, Scikit-Learn

Frameworks & Libraries: React, Node.js, Spring Boot

Cloud & Tools: AWS (EC2, S3, RDS, IAM), Azure AI, Git, GitHub, MySQL, VS Code

PROJECTS

AI-Powered Collaborative Coding Assessment Platform

2026

Collaborated in a team project to build a real-time collaborative coding platform using Monaco Editor, WebSockets, and Python with multi-language execution, live cursor tracking, and instant terminal synchronization. Integrated Gemini AI to automate problem generation, dynamic test case creation, and coding assistance; implemented proctoring features to monitor user activity and ensure secure assessments.

AI Street Animal Rescue System

2025

Developed a CNN-based disease detection model using Python, TensorFlow, and OpenCV to identify animal diseases from images and trigger automated rescue alerts to NGOs; integrated a Java Spring Boot backend with Python AI modules via REST APIs for real-time alert dispatch.

AI-Powered Customer Support Chatbot

2024

Built a Python-based AI chatbot using Azure AI Language and Azure Bot Services to deliver automated, context-aware customer support responses; implemented intent recognition and session management to reduce manual query handling and improve response time.

EXPERIENCE

MaksVision Edutech & IT Services

Jan 2026 – Mar 2026

Full-Stack Developer Intern | Amravati, Maharashtra

- Developed and delivered full-stack web features using React (frontend) and Node.js with Spring Boot (backend); integrated REST APIs, implemented database operations, and contributed to a production-level codebase maintained by the engineering team.
- Completed all assigned milestones on time across the 3-month programme, demonstrating consistent ownership, cross-functional collaboration, punctuality, and a proactive approach to problem-solving.
- Gained practical exposure to REST API integration and backend architecture patterns applicable to AI model deployment workflows.

AWS Academy — Cloud & Data Engineering Virtual Programme

2024

Virtual Training Programme

- Designed scalable, cost-optimised cloud architectures on AWS using EC2, S3, RDS, and IAM; completed the Data Engineering track covering ETL pipeline construction, data lake design, and practical cloud data workflows aligned with industry best practices.

EDUCATION

Prof. Ram Meghe Institute of Technology and Research, Amravati — B.Tech — Information Technology

2022 – 2026

Amolakchand Mahavidyalaya, Yavatmal — HSC — 75.50% | CET Percentile: 87.32

2020 – 2022

Raj English Medium School, Yavatmal — SSC — Maharashtra State Board — 90.60%

2020

CERTIFICATIONS

AI Skills Challenge — Microsoft (2024) | AWS Academy — Cloud Architecture (2024) | AWS Academy — Data Engineering (2024) | Complete Web Development — Udemy (2024) | Core Java Certificate | Cisco Networking Academy | SIH 2024 Internal Hackathon

EXTRACURRICULAR ACTIVITIES

- Coordinator, Kaleidoscope Cultural Club (KCC) — spearheaded college-wide event organisation and cultural management, overseeing planning, coordination, and execution of multiple annual cultural events.
- Achieved 1st place in the College Interdepartmental Kho-Kho Championship, demonstrating teamwork and leadership; active participant in college dance and inter-department cultural gatherings.
